Dear Eller College Admissions Committee:

I am seeking admission to Eller College of Management to study Management Information Systems (MIS). While working at the Phoenix VA Hospital, I was involved in a major upgrade to the pharmacy's automations and technologies; seeing the benefits of this upgrade led me to choose MIS. Eller College will highlight my abilities to adapt, multitask, and collaborate. Eller has the best program for my major and has created a culture of learning by the use of cohorts and collaboration that I would be proud to be a part of.

Moving around the United States and Panama throughout my life has helped me to be adaptable in varying situations and cultures. During my college career, I have been a part-time employee at the Tucson VA Hospital pharmacy and the full-time stay-at-home dad for my two-year-old son and eight-month-old daughter, and I recently completed an internship with a startup E-commerce company. With the many constraints on my time, I was able to earn my Associate in Business Administration, create a comprehensive learning environment for my children, and help in the creation of a fledgling startup business. Working in a government-run pharmacy has taught me how to collaborate in teams to complete goals in a tightly regulated bureaucracy.

If admitted to Eller, I would bring my extensive work experience, unending educational drive for both me and my children; as well as my knowledge gained from helping a new business grow. My goal in life is to help people and improve businesses through the use of automation and technology. I recognize Eller's MIS program is the best way for me to reach that goal, and I will commit to improve myself and others through collaboration to progress the overall rank of the program to #1. Thank you for your consideration and time.

Sincerely,

Jarrett Jonas
